**Things to do:**

1. Map - API(Heather)
2. Friend users & add friends into the fridge (Tiange, & coordinate with Charles about Fridge)
   a. Fridge - send friend request
   b. Get users by fridge id
3. filter(vue library) / tag enter (Heather)
4. mongoDB - look at the workshop earlier (Charles)
5. UI design
6. Chat system
7. Notification system - twilio

**Mvp presentation feedback:**

- Fridge by vicinity/location
- Request or post a need, not just items
- Daniel: can someone claim part of a posting? Us: no.
- Adjust UI and everything. Move buttons location.
